

FAASTeam presents:

Proper Maintenance Procedures for the Owner/Operator

As an aircraft Owner/Operator, proper maintenance is critical to safe flight. This event will cover Preflight Checklists, Type Certificate Data Sheets (TCDS), Airworthiness Directives (AD's), and AC43.13-1b. We will discuss Maintenance procedures, Preventive Maintenance and CFR Part 43. Learn to recognize an incorrect safety wiring of a major component. Learn the importance of a 100 hr/Annual Inspection and what technicians look for and accomplish during those inspections. Learn how to properly safety wire a bolt or an oil filter. Recognize incorrect safety wiring. Don't miss this informative briefing. Click the link below and register TODAY.

Directions: Exit 40 off of Interstate 26, turn to the Asheville Regional Airport. Turn right on to Aviation Way. The event will be held in the Lacy Griffin Building (Western North Carolina Aviation).

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
